

Electricity Switching - May 2017

Over 2.2m switch energy supplier so far in 2017

May switching up 19 percent on last year

New data released today reveals more than 430,000 customers switched supplier last month. This is an increase of 19 percent on last May and takes the total number of switches in 2017 to over 2.2 million. May also saw three in ten (128,180) customers switch from a large supplier to a small or mid-tier supplier.

Lawrence Slade, chief executive of Energy UK, said:

“More than 2.2 million customers have already switched this year, and we want to see this increasing engagement in the market continue. We’re looking forward to working with the Government to ensure competition continues to flourish and ensure consumers get a fair energy deal.”

Tina Tietjen, independent chair of the Energy Switch Guarantee, said:

“It is encouraging that so many consumers shopped around for a better energy deal despite the record high temperatures in May.

“It only takes a few minutes to find out if you’re on the best deal for you. I urge all consumers to get in touch with their supplier or use a price comparison website to make sure they’re on the best deal. There are savings to be made and Energy Switch Guarantee provides customers with extra reassurance that the process will be simple, speedy and safe.”

Notes for editors

- ▶ [To see the latest monthly switching stats, please visit Energy UK’s website.](#)
- ▶ Around 74 per cent of the market are signatories of the Guarantee. This includes: British Gas, Bulb Energy, E.ON, EDF Energy, First Utility, Flow Energy, npower, Octopus Energy, Sainsbury’s Energy, Scottish Power, So Energy and Tonik Energy. For more information about the Guarantee: www.energyswitchguarantee.com
- ▶ The switching data is supplied by Electralink who provides a secure service to transfer data between the electricity market participants. The company operates the Data Transfer Network (DTN) which underpins customer switching, meter interoperability and other business processes critical to a competitive electricity market.
- ▶ The data referenced in these reports is since our collection of data only and is for electricity only. These figures include both domestic & non-domestic customers.

Change of Supply Event

A 'Change of Supply Event' is the industry term for describing when a domestic or non-domestic customer moves from one supplier to another. The total number of electricity switches in May was 438,541.

Change of Supply definition

► Change of supply is an event in which a customer intends to switch electricity supply from their current supplier to a new supplier. When there is no objection from the old supplier and all the requisite intermediate processes are completed, the new supplier starts supplying the customer's premises. The number of change of supply events shown is the total number of changes from one supplier to another which have completed in the month and where the new supplier has started supplying the electricity.
